Table of Contents

Week 1	Jan 5, 2025	Falling from Heights: Scaffolding Safety
Week 2	Jan 12, 2025	Electrical Safety: Arc Flash Hazards
Week 3	Jan 19, 2025	Crane and Hoist Safety
Week 4	Jan 26, 2025	Fall Protection: Harnesses and Hard Hats

Falling from Heights: Scaffolding Safety

WEEK 1

Jan 5, 2025

JOBSITE: _____ DATE: _____ SUPERVISOR: _____

OSHA: 29 CFR 19

Falling from heights is one of the leading causes of death in the construction industry. Scaffolding is often the primary means of access for workers at heights. Ensure scaffolding is erected, maintained, and used correctly.

REAL INCIDENT REPORT

On a construction site, a worker failed to secure a scaffold plank, resulting in a 30-foot fall. The worker suffered severe head injuries and was hospitalized for weeks.

FOREMAN TALKING SCRIPT (Read This to Your Crew)

Conduct regular scaffolding inspections and ensure workers are properly trained on scaffolding safety.

CREW DISCUSSION POINTS

1. What are the primary causes of scaffolding accidents?
2. How can workers prevent falls from scaffolding?
3. What are the consequences of failing to secure scaffolding?

PRE-WORK SAFETY CHECKLIST

- [ ] Scaffolding is erected on level ground
- [ ] Scaffolding is secured to the building or structure
- [ ] Planks are securely fastened to the scaffolding

QUICK KNOWLEDGE CHECK

Q: What is the primary cause of scaffolding accidents?

A: Failing to secure scaffolding or using it incorrectly

Electrical Safety: Arc Flash Hazards

WEEK 2

Jan 12, 2025

JOBSITE: _____ DATE: _____ SUPERVISOR: _____

OSHA: 29 CFR 19

Electrical shock and arc flash hazards can be deadly in the construction industry. Ensure workers are aware of electrical hazards and follow proper procedures.

REAL INCIDENT REPORT

A worker was electrocuted while working on a live electrical panel. The worker's body arced with electricity, causing severe burns and death.

FOREMAN TALKING SCRIPT (Read This to Your Crew)

Conduct regular electrical safety training and ensure workers are aware of arc flash hazards.

CREW DISCUSSION POINTS

1. What are the primary causes of electrical accidents?
2. How can workers prevent electrical shock?
3. What are the consequences of failing to de-energize electrical sources?

PRE-WORK SAFETY CHECKLIST

- [ ] Identify electrical hazards before starting work
- [ ] Use personal protective equipment (PPE) near electrical sources
- [ ] De-energize electrical sources before maintenance

QUICK KNOWLEDGE CHECK

Q: What is the primary cause of electrical accidents?

A: Failing to identify or follow proper procedures for electrical hazards

CREW ATTENDANCE LOG

Crane and Hoist Safety

WEEK 3

Jan 19, 2025

JOBSITE: _____ DATE: _____ SUPERVISOR: _____

OSHA: 29 CFR 19

Crane and hoist accidents can be devastating in the construction industry. Ensure workers are aware of crane and hoist hazards and follow proper procedures.

REAL INCIDENT REPORT

A crane operator failed to properly secure a load, resulting in a 10-ton crane boom falling and crushing a worker.

FOREMAN TALKING SCRIPT (Read This to Your Crew)

Conduct regular crane and hoist safety training and ensure workers are aware of hazards.

CREW DISCUSSION POINTS

1. What are the primary causes of crane and hoist accidents?
2. How can workers prevent crane and hoist accidents?
3. What are the consequences of failing to properly secure loads?

PRE-WORK SAFETY CHECKLIST

- [ ] Conduct regular crane inspections
- [ ] Ensure crane operators are properly trained and certified
- [ ] Use proper rigging and lifting techniques

QUICK KNOWLEDGE CHECK

Q: What is the primary cause of crane and hoist accidents?

A: Failing to properly secure loads or follow proper procedures

CREW ATTENDANCE LOG

Fall Protection: Harnesses and Hard Hats

WEEK 4

Jan 26, 2025

JOBSITE: _____ DATE: _____ SUPERVISOR: _____

OSHA: 29 CFR 19

Fall protection is critical in the construction industry. Ensure workers are aware of fall protection hazards and follow proper procedures.

REAL INCIDENT REPORT

A worker fell 20 feet while working on a roof without a harness. The worker suffered severe head injuries and was hospitalized for weeks.

FOREMAN TALKING SCRIPT (Read This to Your Crew)

Conduct regular fall protection training and ensure workers are aware of hazards.

CREW DISCUSSION POINTS

1. What are the primary causes of fall protection accidents?
2. How can workers prevent fall protection accidents?
3. What are the consequences of failing to wear proper PPE?

PRE-WORK SAFETY CHECKLIST

- [ ] Wear a hard hat and safety glasses
- [ ] Use a harness when working at heights
- [ ] Ensure fall protection equipment is properly inspected and maintained

QUICK KNOWLEDGE CHECK

Q: What is the primary cause of fall protection accidents?

A: Failing to wear proper PPE or follow proper procedures
