Falling from Heights: Scaffolding Safety

WEEK 1

Jan 5, 2025

JOBSITE: _____ DATE: _____ SUPERVISOR: _____

OSHA: 29 CFR 19

Falling from heights is one of the leading causes of death in the construction industry. Scaffolding is often the primary means of access for workers at heights. Ensure scaffolding is erected, maintained, and used correctly.

REAL INCIDENT REPORT

On a construction site, a worker failed to secure a scaffold plank, resulting in a 30-foot fall. The worker suffered severe head injuries and was hospitalized for weeks.

FOREMAN TALKING SCRIPT (Read This to Your Crew)

Conduct regular scaffolding inspections and ensure workers are properly trained on scaffolding safety.

CREW DISCUSSION POINTS

1. What are the primary causes of scaffolding accidents?
2. How can workers prevent falls from scaffolding?
3. What are the consequences of failing to secure scaffolding?

PRE-WORK SAFETY CHECKLIST

- [ ] Scaffolding is erected on level ground
- [ ] Scaffolding is secured to the building or structure
- [ ] Planks are securely fastened to the scaffolding

QUICK KNOWLEDGE CHECK

Q: What is the primary cause of scaffolding accidents?

A: Failing to secure scaffolding or using it incorrectly

CREW ATTENDANCE LOG

PRINT NAME	SIGNATURE	DATE	NOTES

Electrical Safety: Arc Flash Hazards

WEEK 2

Jan 12, 2025

JOBSITE: _____ DATE: _____ SUPERVISOR: _____

OSHA: 29 CFR 19

Electrical shock and arc flash hazards can be deadly in the construction industry. Ensure workers are aware of electrical hazards and follow proper procedures.

REAL INCIDENT REPORT

A worker was electrocuted while working on a live electrical panel. The worker's body arced with electricity, causing severe burns and death.

FOREMAN TALKING SCRIPT (Read This to Your Crew)

Conduct regular electrical safety training and ensure workers are aware of arc flash hazards.

CREW DISCUSSION POINTS

1. What are the primary causes of electrical accidents?
2. How can workers prevent electrical shock?
3. What are the consequences of failing to de-energize electrical sources?

PRE-WORK SAFETY CHECKLIST

- [ ] Identify electrical hazards before starting work
- [ ] Use personal protective equipment (PPE) near electrical sources
- [ ] De-energize electrical sources before maintenance

QUICK KNOWLEDGE CHECK

Q: What is the primary cause of electrical accidents?

A: Failing to identify or follow proper procedures for electrical hazards

CREW ATTENDANCE LOG

PRINT NAME	SIGNATURE	DATE	NOTES

Crane and Hoist Safety

WEEK 3

Jan 19, 2025

JOBSITE: _____ DATE: _____ SUPERVISOR: _____

OSHA: 29 CFR 19

Crane and hoist accidents can be devastating in the construction industry. Ensure workers are aware of crane and hoist hazards and follow proper procedures.

REAL INCIDENT REPORT

A crane operator failed to properly secure a load, resulting in a 10-ton crane boom falling and crushing a worker.

FOREMAN TALKING SCRIPT (Read This to Your Crew)

Conduct regular crane and hoist safety training and ensure workers are aware of hazards.

CREW DISCUSSION POINTS

1. What are the primary causes of crane and hoist accidents?
2. How can workers prevent crane and hoist accidents?
3. What are the consequences of failing to properly secure loads?

PRE-WORK SAFETY CHECKLIST

- [ ] Conduct regular crane inspections
- [ ] Ensure crane operators are properly trained and certified
- [ ] Use proper rigging and lifting techniques

QUICK KNOWLEDGE CHECK

Q: What is the primary cause of crane and hoist accidents?

A: Failing to properly secure loads or follow proper procedures

CREW ATTENDANCE LOG

PRINT NAME	SIGNATURE	DATE	NOTES

Fall Protection: Harnesses and Hard Hats

WEEK 4

Jan 26, 2025

JOBSITE: _____ DATE: _____ SUPERVISOR: _____

OSHA: 29 CFR 19

Fall protection is critical in the construction industry. Ensure workers are aware of fall protection hazards and follow proper procedures.

REAL INCIDENT REPORT

A worker fell 20 feet while working on a roof without a harness. The worker suffered severe head injuries and was hospitalized for weeks.

FOREMAN TALKING SCRIPT (Read This to Your Crew)

Conduct regular fall protection training and ensure workers are aware of hazards.

CREW DISCUSSION POINTS

1. What are the primary causes of fall protection accidents?
2. How can workers prevent fall protection accidents?
3. What are the consequences of failing to wear proper PPE?

PRE-WORK SAFETY CHECKLIST

- [ ] Wear a hard hat and safety glasses
- [ ] Use a harness when working at heights
- [ ] Ensure fall protection equipment is properly inspected and maintained

QUICK KNOWLEDGE CHECK

Q: What is the primary cause of fall protection accidents?

A: Failing to wear proper PPE or follow proper procedures

CREW ATTENDANCE LOG

PRINT NAME	SIGNATURE	DATE	NOTES

Confined Space Entry: Permits and Ventilation

WEEK 5

Feb 2, 2025

JOBSITE: _____ DATE: _____ SUPERVISOR: _____

OSHA: 29 CFR 19

Confined space entry can be deadly in the construction industry. Ensure workers are aware of confined space hazards and follow proper procedures.

REAL INCIDENT REPORT

A worker entered a confined space without proper ventilation, resulting in asphyxiation. The worker died due to lack of oxygen.

FOREMAN TALKING SCRIPT (Read This to Your Crew)

Conduct regular confined space training and ensure workers are aware of hazards.

CREW DISCUSSION POINTS

1. What are the primary causes of confined space entry accidents?
2. How can workers prevent confined space entry accidents?
3. What are the consequences of failing to obtain a permit?

PRE-WORK SAFETY CHECKLIST

- [ ] Conduct a confined space hazard assessment
- [ ] Obtain a permit before entering a confined space
- [ ] Ensure proper ventilation before entering a confined space

QUICK KNOWLEDGE CHECK

Q: What is the primary cause of confined space entry accidents?

A: Failing to obtain a permit or follow proper procedures

CREW ATTENDANCE LOG

PRINT NAME	SIGNATURE	DATE	NOTES

Lockout/Tagout: Preventing Unexpected Starts

WEEK 6

Feb 9, 2025

JOBSITE: _____ DATE: _____ SUPERVISOR: _____

OSHA: 29 CFR 19

Lockout/tagout is critical in preventing unexpected starts of equipment and machinery. Ensure workers are aware of lockout/tagout hazards and follow proper procedures.

REAL INCIDENT REPORT

A worker was injured when a machine suddenly started while they were performing maintenance. The worker's hand was crushed by the machine.

FOREMAN TALKING SCRIPT (Read This to Your Crew)

Conduct regular lockout/tagout training and ensure workers are aware of hazards.

CREW DISCUSSION POINTS

1. What are the primary causes of lockout/tagout accidents?
2. How can workers prevent lockout/tagout accidents?
3. What are the consequences of failing to follow proper procedures?

PRE-WORK SAFETY CHECKLIST

- [ ] Conduct a lockout/tagout procedure before maintenance
- [ ] Ensure all energy sources are isolated
- [ ] Use a lockout/tagout device to prevent unexpected starts

QUICK KNOWLEDGE CHECK

Q: What is the primary cause of lockout/tagout accidents?

A: Failing to follow proper procedures or isolate energy sources

CREW ATTENDANCE LOG

PRINT NAME	SIGNATURE	DATE	NOTES

Eye and Face Protection: Safety Glasses and Goggles

WEEK 7

Feb 16, 2025

JOBSITE: _____ DATE: _____ SUPERVISOR: _____

OSHA: 29 CFR 19

Eye and face protection is critical in preventing injuries from flying particles and chemicals. Ensure workers are aware of eye and face hazards and follow proper procedures.

REAL INCIDENT REPORT

A worker was blinded by a flying particle while performing welding. The worker suffered permanent vision loss.

FOREMAN TALKING SCRIPT (Read This to Your Crew)

Conduct regular eye and face protection training and ensure workers are aware of hazards.

CREW DISCUSSION POINTS

1. What are the primary causes of eye and face protection accidents?
2. How can workers prevent eye and face protection accidents?
3. What are the consequences of failing to wear proper PPE?

PRE-WORK SAFETY CHECKLIST

- [ ] Wear safety glasses or goggles when working with power tools
- [ ] Use eye protection when working with chemicals
- [ ] Ensure eye protection is properly fitted and maintained

QUICK KNOWLEDGE CHECK

Q: What is the primary cause of eye and face protection accidents?

A: Failing to wear proper PPE or follow proper procedures

CREW ATTENDANCE LOG

PRINT NAME	SIGNATURE	DATE	NOTES

Fire Safety: Extinguishers and Emergency Procedures

WEEK 8

Feb 23, 2025

JOBSITE: _____ DATE: _____ SUPERVISOR: _____

OSHA: 29 CFR 19

Fire safety is critical in preventing injuries and fatalities from fires. Ensure workers are aware of fire hazards and follow proper procedures.

REAL INCIDENT REPORT

A fire broke out in a warehouse, causing widespread damage and injuring several workers. The workers were unable to escape due to locked doors.

FOREMAN TALKING SCRIPT (Read This to Your Crew)

Conduct regular fire safety training and ensure workers are aware of hazards.

CREW DISCUSSION POINTS

1. What are the primary causes of fire safety accidents?
2. How can workers prevent fire safety accidents?
3. What are the consequences of failing to follow proper procedures?

PRE-WORK SAFETY CHECKLIST

- [ ] Conduct regular fire safety training
- [ ] Ensure fire extinguishers are properly inspected and maintained
- [ ] Develop an emergency evacuation plan

QUICK KNOWLEDGE CHECK

Q: What is the primary cause of fire safety accidents?

A: Failing to follow proper procedures or maintain fire extinguishers

CREW ATTENDANCE LOG

PRINT NAME	SIGNATURE	DATE	NOTES

Hazard Communication: Labels and Safety Data Sheets

WEEK 9

Mar 2, 2025

JOBSITE: _____ DATE: _____ SUPERVISOR: _____

OSHA: 29 CFR 19

Hazard communication is critical in preventing injuries and fatalities from hazardous chemicals. Ensure workers are aware of hazard communication hazards and follow proper procedures.

REAL INCIDENT REPORT

A worker was exposed to a hazardous chemical without proper training or PPE. The worker suffered severe respiratory problems and was hospitalized.

FOREMAN TALKING SCRIPT (Read This to Your Crew)

Conduct regular hazard communication training and ensure workers are aware of hazards.

CREW DISCUSSION POINTS

1. What are the primary causes of hazard communication accidents?
2. How can workers prevent hazard communication accidents?
3. What are the consequences of failing to follow proper procedures?

PRE-WORK SAFETY CHECKLIST

- [ ] Conduct regular hazard communication training
- [ ] Ensure labels and safety data sheets are properly maintained
- [ ] Develop a hazard communication plan

QUICK KNOWLEDGE CHECK

Q: What is the primary cause of hazard communication accidents?

A: Failing to follow proper procedures or maintain labels and safety data sheets

CREW ATTENDANCE LOG

PRINT NAME	SIGNATURE	DATE	NOTES

Personal Protective Equipment (PPE): Masks and Respirators

WEEK 10

Mar 9, 2025

JOBSITE: _____ DATE: _____ SUPERVISOR: _____

OSHA: 29 CFR 19

Personal protective equipment (PPE) is critical in preventing injuries and fatalities from hazardous materials. Ensure workers are aware of PPE hazards and follow proper procedures.

REAL INCIDENT REPORT

A worker was exposed to hazardous dust without proper PPE. The worker suffered severe respiratory problems and was hospitalized.

FOREMAN TALKING SCRIPT (Read This to Your Crew)

Conduct regular PPE training and ensure workers are aware of hazards.

CREW DISCUSSION POINTS

1. What are the primary causes of PPE accidents?
2. How can workers prevent PPE accidents?
3. What are the consequences of failing to wear proper PPE?

PRE-WORK SAFETY CHECKLIST

- [ ] Wear a mask or respirator when working with hazardous materials
- [ ] Ensure PPE is properly fitted and maintained
- [ ] Conduct regular PPE training

QUICK KNOWLEDGE CHECK

Q: What is the primary cause of PPE accidents?

A: Failing to wear proper PPE or follow proper procedures

CREW ATTENDANCE LOG

PRINT NAME	SIGNATURE	DATE	NOTES

Fall Protection: Scaffolding and Ladders

WEEK 11

Mar 16, 2025

JOBSITE: _____ DATE: _____ SUPERVISOR: _____

OSHA: 29 CFR 19

Fall protection is critical in preventing injuries and fatalities from falls. Ensure workers are aware of fall protection hazards and follow proper procedures.

REAL INCIDENT REPORT

A worker fell from a ladder while working on a roof. The worker suffered severe head injuries and was hospitalized.

FOREMAN TALKING SCRIPT (Read This to Your Crew)

Conduct regular fall protection training and ensure workers are aware of hazards.

CREW DISCUSSION POINTS

1. What are the primary causes of fall protection accidents?
2. How can workers prevent fall protection accidents?
3. What are the consequences of failing to follow proper procedures?

PRE-WORK SAFETY CHECKLIST

- [ ] Use a ladder or scaffolding when working at heights
- [ ] Ensure ladders and scaffolding are properly inspected and maintained
- [ ] Wear a harness when working at heights

QUICK KNOWLEDGE CHECK

Q: What is the primary cause of fall protection accidents?

A: Failing to follow proper procedures or maintain ladders and scaffolding

CREW ATTENDANCE LOG

PRINT NAME	SIGNATURE	DATE	NOTES

Crane and Hoist Safety: Pre-Shift Inspections

WEEK 12

Mar 23, 2025

JOBSITE: _____ DATE: _____ SUPERVISOR: _____

OSHA: 29 CFR 19

Crane and hoist safety is critical in preventing injuries and fatalities from crane and hoist accidents. Ensure workers are aware of crane and hoist hazards and follow proper procedures.

REAL INCIDENT REPORT

A crane operator failed to conduct a pre-shift inspection, resulting in a crane boom falling and crushing a worker.

FOREMAN TALKING SCRIPT (Read This to Your Crew)

Conduct regular crane and hoist safety training and ensure workers are aware of hazards.

CREW DISCUSSION POINTS

1. What are the primary causes of crane and hoist accidents?
2. How can workers prevent crane and hoist accidents?
3. What are the consequences of failing to conduct a pre-shift inspection?

PRE-WORK SAFETY CHECKLIST

- [ ] Conduct a pre-shift inspection before operating a crane or hoist
- [ ] Ensure all safety devices are properly functioning
- [ ] Use proper rigging and lifting techniques

QUICK KNOWLEDGE CHECK

Q: What is the primary cause of crane and hoist accidents?

A: Failing to conduct a pre-shift inspection or follow proper procedures

CREW ATTENDANCE LOG

PRINT NAME	SIGNATURE	DATE	NOTES

Fire Extinguisher Training: Proper Use and Maintenance

WEEK 13

Mar 30, 2025

JOBSITE: _____ DATE: _____ SUPERVISOR: _____

OSHA: 29 CFR 19

Fire extinguisher training is critical in preventing injuries and fatalities from fires. Ensure workers are aware of fire extinguisher hazards and follow proper procedures.

REAL INCIDENT REPORT

A worker used a fire extinguisher incorrectly, resulting in the fire spreading and causing widespread damage.

FOREMAN TALKING SCRIPT (Read This to Your Crew)

Conduct regular fire extinguisher training and ensure workers are aware of hazards.

CREW DISCUSSION POINTS

1. What are the primary causes of fire extinguisher accidents?
2. How can workers prevent fire extinguisher accidents?
3. What are the consequences of failing to follow proper procedures?

PRE-WORK SAFETY CHECKLIST

- [ ] Conduct regular fire extinguisher training
- [ ] Ensure fire extinguishers are properly inspected and maintained
- [ ] Use a fire extinguisher only when necessary

QUICK KNOWLEDGE CHECK

Q: What is the primary cause of fire extinguisher accidents?

A: Failing to follow proper procedures or maintain fire extinguishers

CREW ATTENDANCE LOG

PRINT NAME	SIGNATURE	DATE	NOTES

Respiratory Protection: Masks and Respirators

WEEK 14

Apr 6, 2025

JOBSITE: _____ DATE: _____ SUPERVISOR: _____

OSHA: 29 CFR 19

Respiratory protection is critical in preventing injuries and fatalities from hazardous materials. Ensure workers are aware of respiratory protection hazards and follow proper procedures.

REAL INCIDENT REPORT

A worker was exposed to hazardous dust without proper respiratory protection. The worker suffered severe respiratory problems and was hospitalized.

FOREMAN TALKING SCRIPT (Read This to Your Crew)

Conduct regular respiratory protection training and ensure workers are aware of hazards.

CREW DISCUSSION POINTS

1. What are the primary causes of respiratory protection accidents?
2. How can workers prevent respiratory protection accidents?
3. What are the consequences of failing to wear proper respiratory protection?

PRE-WORK SAFETY CHECKLIST

- [ ] Wear a mask or respirator when working with hazardous materials
- [ ] Ensure respiratory protection is properly fitted and maintained
- [ ] Conduct regular respiratory protection training

QUICK KNOWLEDGE CHECK

Q: What is the primary cause of respiratory protection accidents?

A: Failing to wear proper respiratory protection or follow proper procedures

CREW ATTENDANCE LOG

PRINT NAME	SIGNATURE	DATE	NOTES

Electrical Safety: Arc Flash and Shock Hazards

WEEK 15

Apr 13, 2025

JOBSITE: _____ DATE: _____ SUPERVISOR: _____

OSHA: 29 CFR 19

Electrical safety is critical in preventing injuries and fatalities from electrical shock and arc flash hazards. Ensure workers are aware of electrical hazards and follow proper procedures.

REAL INCIDENT REPORT

A worker was electrocuted while working on a live electrical panel. The worker's body arced with electricity, causing severe burns and death.

FOREMAN TALKING SCRIPT (Read This to Your Crew)

Conduct regular electrical safety training and ensure workers are aware of arc flash and shock hazards.

CREW DISCUSSION POINTS

1. What are the primary causes of electrical accidents?
2. How can workers prevent electrical accidents?
3. What are the consequences of failing to follow proper procedures?

PRE-WORK SAFETY CHECKLIST

- [ ] Identify electrical hazards before starting work
- [ ] Use personal protective equipment (PPE) near electrical sources
- [ ] De-energize electrical sources before maintenance

QUICK KNOWLEDGE CHECK

Q: What is the primary cause of electrical accidents?

A: Failing to follow proper procedures or identify electrical hazards

CREW ATTENDANCE LOG

PRINT NAME	SIGNATURE	DATE	NOTES

Confined Space Entry: Ventilation and Monitoring

WEEK 16

Apr 20, 2025

JOBSITE: _____ DATE: _____ SUPERVISOR: _____

OSHA: 29 CFR 19

Confined space entry is critical in preventing injuries and fatalities from confined space hazards. Ensure workers are aware of confined space hazards and follow proper procedures.

REAL INCIDENT REPORT

A worker entered a confined space without proper ventilation, resulting in asphyxiation. The worker died due to lack of oxygen.

FOREMAN TALKING SCRIPT (Read This to Your Crew)

Conduct regular confined space training and ensure workers are aware of hazards.

CREW DISCUSSION POINTS

1. What are the primary causes of confined space entry accidents?
2. How can workers prevent confined space entry accidents?
3. What are the consequences of failing to follow proper procedures?

PRE-WORK SAFETY CHECKLIST

- [ ] Conduct a confined space hazard assessment
- [ ] Obtain a permit before entering a confined space
- [ ] Ensure proper ventilation before entering a confined space

QUICK KNOWLEDGE CHECK

Q: What is the primary cause of confined space entry accidents?

A: Failing to follow proper procedures or obtain a permit

CREW ATTENDANCE LOG

PRINT NAME	SIGNATURE	DATE	NOTES

Lockout/Tagout: Equipment and Machinery

WEEK 17

Apr 27, 2025

JOBSITE: _____ DATE: _____ SUPERVISOR: _____

OSHA: 29 CFR 19

Lockout/tagout is critical in preventing injuries and fatalities from unexpected starts of equipment and machinery. Ensure workers are aware of lockout/tagout hazards and follow proper procedures.

REAL INCIDENT REPORT

A worker was injured when a machine suddenly started while they were performing maintenance. The worker's hand was crushed by the machine.

FOREMAN TALKING SCRIPT (Read This to Your Crew)

Conduct regular lockout/tagout training and ensure workers are aware of hazards.

CREW DISCUSSION POINTS

1. What are the primary causes of lockout/tagout accidents?
2. How can workers prevent lockout/tagout accidents?
3. What are the consequences of failing to follow proper procedures?

PRE-WORK SAFETY CHECKLIST

- [ ] Conduct a lockout/tagout procedure before maintenance
- [ ] Ensure all energy sources are isolated
- [ ] Use a lockout/tagout device to prevent unexpected starts

QUICK KNOWLEDGE CHECK

Q: What is the primary cause of lockout/tagout accidents?

A: Failing to follow proper procedures or isolate energy sources

CREW ATTENDANCE LOG

PRINT NAME	SIGNATURE	DATE	NOTES

Hazardous Materials: Storage and Handling

WEEK 18

May 4, 2025

JOBSITE: _____ DATE: _____ SUPERVISOR: _____

OSHA: 29 CFR 19

Hazardous materials are critical in preventing injuries and fatalities from hazardous materials. Ensure workers are aware of hazardous materials hazards and follow proper procedures.

REAL INCIDENT REPORT

A worker was exposed to a hazardous chemical without proper training or PPE. The worker suffered severe respiratory problems and was hospitalized.

FOREMAN TALKING SCRIPT (Read This to Your Crew)

Conduct regular hazardous materials training and ensure workers are aware of hazards.

CREW DISCUSSION POINTS

1. What are the primary causes of hazardous materials accidents?
2. How can workers prevent hazardous materials accidents?
3. What are the consequences of failing to follow proper procedures?

PRE-WORK SAFETY CHECKLIST

- [ ] Conduct regular hazardous materials training
- [ ] Ensure labels and safety data sheets are properly maintained
- [ ] Develop a hazardous materials plan

QUICK KNOWLEDGE CHECK

Q: What is the primary cause of hazardous materials accidents?

A: Failing to follow proper procedures or maintain labels and safety data sheets

Personal Protective Equipment (PPE): Head and Foot Protection

WEEK 19

May 11, 2025

JOBSITE: _____ DATE: _____ SUPERVISOR: _____

OSHA: 29 CFR 19

Personal protective equipment (PPE) is critical in preventing injuries and fatalities from hazardous materials. Ensure workers are aware of PPE hazards and follow proper procedures.

REAL INCIDENT REPORT

A worker was struck by a falling object without proper head protection. The worker suffered severe head injuries and was hospitalized.

FOREMAN TALKING SCRIPT (Read This to Your Crew)

Conduct regular PPE training and ensure workers are aware of hazards.

CREW DISCUSSION POINTS

1. What are the primary causes of PPE accidents?
2. How can workers prevent PPE accidents?
3. What are the consequences of failing to wear proper PPE?

PRE-WORK SAFETY CHECKLIST

- [ ] Wear a hard hat and safety glasses
- [ ] Use foot protection when working in areas with hazardous materials
- [ ] Ensure PPE is properly fitted and maintained

QUICK KNOWLEDGE CHECK

Q: What is the primary cause of PPE accidents?

A: Failing to wear proper PPE or follow proper procedures

CREW ATTENDANCE LOG

PRINT NAME	SIGNATURE	DATE	NOTES

Fire Safety: Emergency Escape Plans

WEEK 20

May 18, 2025

JOBSITE: _____ DATE: _____ SUPERVISOR: _____

OSHA: 29 CFR 19

Fire safety is critical in preventing injuries and fatalities from fires. Ensure workers are aware of fire hazards and follow proper procedures.

REAL INCIDENT REPORT

A fire broke out in a warehouse, causing widespread damage and injuring several workers. The workers were unable to escape due to locked doors.

FOREMAN TALKING SCRIPT (Read This to Your Crew)

Conduct regular fire safety training and ensure workers are aware of hazards.

CREW DISCUSSION POINTS

1. What are the primary causes of fire safety accidents?
2. How can workers prevent fire safety accidents?
3. What are the consequences of failing to follow proper procedures?

PRE-WORK SAFETY CHECKLIST

- [ ] Conduct regular fire safety training
- [ ] Ensure fire extinguishers are properly inspected and maintained
- [ ] Develop an emergency evacuation plan

WEEK 24

Jun 15, 2025

JOBSITE: _____ DATE: _____ SUPERVISOR: _____

OSHA: 29 CFR 19

Hazardous materials are critical in preventing injuries and fatalities from hazardous materials. Ensure workers are aware of hazardous materials hazards and follow proper procedures.

REAL INCIDENT REPORT

A worker was exposed to a hazardous chemical without proper training or PPE. The worker suffered severe respiratory problems and was hospitalized.

FOREMAN TALKING SCRIPT (Read This to Your Crew)

Conduct regular hazardous materials training and ensure workers are aware of hazards.

CREW DISCUSSION POINTS

1. What are the primary causes of hazardous materials accidents?
2. How can workers prevent hazardous materials accidents?
3. What are the consequences of failing to follow proper procedures?

PRE-WORK SAFETY CHECKLIST

- [ ] Conduct regular hazardous materials training
- [ ] Ensure labels and safety data sheets are properly maintained
- [ ] Develop a hazardous materials plan

QUICK KNOWLEDGE CHECK

Q: What is the primary cause of hazardous materials accidents?

A: Failing to follow proper procedures or maintain labels and safety data sheets

CREW ATTENDANCE LOG

PRINT NAME	SIGNATURE	DATE	NOTES

Personal Protective Equipment (PPE): Head and Foot Protection

WEEK 25

Jun 22, 2025

JOBSITE: _____ DATE: _____ SUPERVISOR: _____

OSHA: 29 CFR 19

Personal protective equipment (PPE) is critical in preventing injuries and fatalities from hazardous materials. Ensure workers are aware of PPE hazards and follow proper procedures.

REAL INCIDENT REPORT

A worker was struck by a falling object without proper head protection. The worker suffered severe head injuries and was hospitalized.

FOREMAN TALKING SCRIPT (Read This to Your Crew)

Conduct regular PPE training and ensure workers are aware of hazards.

CREW DISCUSSION POINTS

1. What are the primary causes of PPE accidents?
2. How can workers prevent PPE accidents?
3. What are the consequences of failing to wear proper PPE?

PRE-WORK SAFETY CHECKLIST

- [ ] Wear a hard hat and safety glasses
- [ ] Use foot protection when working in areas with hazardous materials
- [ ] Ensure PPE is properly fitted and maintained

QUICK KNOWLEDGE CHECK

Q: What is the primary cause of PPE accidents?

A: Failing to wear proper PPE or follow proper procedures

CREW ATTENDANCE LOG

Fire Safety: Emergency Escape Plans

WEEK 26

Jun 29, 2025

JOBSITE: _____ DATE: _____ SUPERVISOR: _____

OSHA: 29 CFR 19

Fire safety is critical in preventing injuries and fatalities from fires. Ensure workers are aware of fire hazards and follow proper procedures.

REAL INCIDENT REPORT

A fire broke out in a warehouse, causing widespread damage and injuring several workers. The workers were unable to escape due to locked doors.

FOREMAN TALKING SCRIPT (Read This to Your Crew)

Conduct regular fire safety training and ensure workers are aware of hazards.

CREW DISCUSSION POINTS

1. What are the primary causes of fire safety accidents?
2. How can workers prevent fire safety accidents?
3. What are the consequences of failing to follow proper procedures?

PRE-WORK SAFETY CHECKLIST

- [ ] Conduct regular fire safety training
- [ ] Ensure fire extinguishers are properly inspected and maintained
- [ ] Develop an emergency evacuation plan

QUICK KNOWLEDGE CHECK

Q: What is the primary cause of fire safety accidents?

A: Failing to follow proper procedures or maintain fire extinguishers

CREW ATTENDANCE LOG

PRINT NAME	SIGNATURE	DATE	NOTES

Respiratory Protection: Dust and Fumes

WEEK 27

Jul 6, 2025

JOBSITE: _____ DATE: _____ SUPERVISOR: _____

OSHA: 29 CFR 19

Respiratory protection is critical in preventing injuries and fatalities from hazardous materials. Ensure workers are aware of respiratory protection hazards and follow proper procedures.

REAL INCIDENT REPORT

A worker was exposed to hazardous dust without proper respiratory protection. The worker suffered severe respiratory problems and was hospitalized.

FOREMAN TALKING SCRIPT (Read This to Your Crew)

Conduct regular respiratory protection training and ensure workers are aware of hazards.

CREW DISCUSSION POINTS

1. What are the primary causes of respiratory protection accidents?
2. How can workers prevent respiratory protection accidents?
3. What are the consequences of failing to wear proper respiratory protection?

PRE-WORK SAFETY CHECKLIST

- [ ] Wear a mask or respirator when working with hazardous materials
- [ ] Ensure respiratory protection is properly fitted and maintained
- [ ] Conduct regular respiratory protection training

QUICK KNOWLEDGE CHECK

Q: What is the primary cause of respiratory protection accidents?

A: Failing to wear proper respiratory protection or follow proper procedures

CREW ATTENDANCE LOG

PRINT NAME	SIGNATURE	DATE	NOTES

Confined Space Entry: Ventilation and Monitoring

WEEK 28

Jul 13, 2025

JOBSITE: _____ DATE: _____ SUPERVISOR: _____

OSHA: 29 CFR 19

Confined space entry is critical in preventing injuries and fatalities from confined space hazards. Ensure workers are aware of confined space hazards and follow proper procedures.

REAL INCIDENT REPORT

A worker entered a confined space without proper ventilation, resulting in asphyxiation. The worker died due to lack of oxygen.

FOREMAN TALKING SCRIPT (Read This to Your Crew)

Conduct regular confined space training and ensure workers are aware of hazards.

CREW DISCUSSION POINTS

1. What are the primary causes of confined space entry accidents?
2. How can workers prevent confined space entry accidents?
3. What are the consequences of failing to follow proper procedures?

PRE-WORK SAFETY CHECKLIST

- [ ] Conduct a confined space hazard assessment
- [ ] Obtain a permit before entering a confined space
- [ ] Ensure proper ventilation before entering a confined space

QUICK KNOWLEDGE CHECK

Q: What is the primary cause of confined space entry accidents?

A: Failing to follow proper procedures or obtain a permit

CREW ATTENDANCE LOG

PRINT NAME	SIGNATURE	DATE	NOTES

Lockout/Tagout: Equipment and Machinery

WEEK 29

Jul 20, 2025

JOBSITE: _____ DATE: _____ SUPERVISOR: _____

OSHA: 29 CFR 19

Lockout/tagout is critical in preventing injuries and fatalities from unexpected starts of equipment and machinery. Ensure workers are aware of lockout/tagout hazards and follow proper procedures.

REAL INCIDENT REPORT

A worker was injured when a machine suddenly started while they were performing maintenance. The worker's hand was crushed by the machine.

FOREMAN TALKING SCRIPT (Read This to Your Crew)

Conduct regular lockout/tagout training and ensure workers are aware of hazards.

CREW DISCUSSION POINTS

1. What are the primary causes of lockout/tagout accidents?
2. How can workers prevent lockout/tagout accidents?
3. What are the consequences of failing to follow proper procedures?

PRE-WORK SAFETY CHECKLIST

- [ ] Conduct a lockout/tagout procedure before maintenance
- [ ] Ensure all energy sources are isolated
- [ ] Use a lockout/tagout device to prevent unexpected starts

QUICK KNOWLEDGE CHECK

Q: What is the primary cause of lockout/tagout accidents?

A: Failing to follow proper procedures or isolate energy sources

CREW ATTENDANCE LOG

Hazardous Materials: Storage and Handling

WEEK 30

Jul 27, 2025

JOBSITE: _____ DATE: _____ SUPERVISOR: _____

OSHA: 29 CFR 19

Hazardous materials are critical in preventing injuries and fatalities from hazardous materials. Ensure workers are aware of hazardous materials hazards and follow proper procedures.

REAL INCIDENT REPORT

A worker was exposed to a hazardous chemical without proper training or PPE. The worker suffered severe respiratory problems and was hospitalized.

FOREMAN TALKING SCRIPT (Read This to Your Crew)

Conduct regular hazardous materials training and ensure workers are aware of hazards.

CREW DISCUSSION POINTS

1. What are the primary causes of hazardous materials accidents?
2. How can workers prevent hazardous materials accidents?
3. What are the consequences of failing to follow proper procedures?

PRE-WORK SAFETY CHECKLIST

- [ ] Conduct regular hazardous materials training
- [ ] Ensure labels and safety data sheets are properly maintained
- [ ] Develop a hazardous materials plan

QUICK KNOWLEDGE CHECK

Q: What is the primary cause of hazardous materials accidents?

A: Failing to follow proper procedures or maintain labels and safety data sheets

Personal Protective Equipment (PPE): Head and Foot Protection

WEEK 31

Aug 3, 2025

JOBSITE: _____ DATE: _____ SUPERVISOR: _____

OSHA: 29 CFR 19

Personal protective equipment (PPE) is critical in preventing injuries and fatalities from hazardous materials. Ensure workers are aware of PPE hazards and follow proper procedures.

REAL INCIDENT REPORT

A worker was struck by a falling object without proper head protection. The worker suffered severe head injuries and was hospitalized.

FOREMAN TALKING SCRIPT (Read This to Your Crew)

Conduct regular PPE training and ensure workers are aware of hazards.

CREW DISCUSSION POINTS

1. What are the primary causes of PPE accidents?
2. How can workers prevent PPE accidents?
3. What are the consequences of failing to wear proper PPE?

PRE-WORK SAFETY CHECKLIST

- [ ] Wear a hard hat and safety glasses
- [ ] Use foot protection when working in areas with hazardous materials
- [ ] Ensure PPE is properly fitted and maintained

QUICK KNOWLEDGE CHECK

Q: What is the primary cause of PPE accidents?

A: Failing to wear proper PPE or follow proper procedures

27. Fall Protection - Harness Inspection

WEEK 34

Aug 24, 2025

JOBSITE: _____ DATE: _____ SUPERVISOR: _____

OSHA: 1926.502(

Regularly inspect harnesses for damage and wear to prevent falls and equipment failure.

REAL INCIDENT REPORT

A worker fell 20 feet while cleaning a window on the 10th floor. The harness failed inspection due to worn straps, and the worker suffered severe injuries. The employer was fined $100,000 for violating OSHA regulations.

FOREMAN TALKING SCRIPT (Read This to Your Crew)

Emphasize the importance of harness inspection and proper storage to prevent equipment failure.

CREW DISCUSSION POINTS

1. What are the consequences of failing to inspect harnesses?
2. How often should harnesses be inspected?
3. What are some common signs of harness wear?

PRE-WORK SAFETY CHECKLIST

- [ ] Inspect harness straps for cuts, frays, or excessive wear
- [ ] Check for proper buckle function and secure attachment to lanyard or lifeline
- [ ] Verify harnesses are stored in a dry, clean environment

QUICK KNOWLEDGE CHECK

Q: How often should harnesses be inspected?

A: Daily

CREW ATTENDANCE LOG

PRINT NAME	SIGNATURE	DATE	NOTES

28. Electrical Safety - Arc Flash Protection

WEEK 35

Aug 31, 2025

JOBSITE: _____ DATE: _____ SUPERVISOR: _____

OSHA: 1926.404(

Implement arc flash protection measures to prevent electrical shock and burns.

REAL INCIDENT REPORT

A lineman was electrocuted while working on a live power line. The employer failed to provide arc flash protection, and the worker suffered severe burns and electrical shock. The employer was fined $200,000 for violating OSHA regulations.

FOREMAN TALKING SCRIPT (Read This to Your Crew)

Discuss the importance of arc flash protection and provide guidance on implementation.

CREW DISCUSSION POINTS

1. What are the risks of arc flash?
2. How can arc flash be prevented?
3. What are some common arc flash protection measures?

PRE-WORK SAFETY CHECKLIST

- [ ] Identify potential arc flash hazards and implement protection measures
- [ ] Use arc-rated personal protective equipment (PPE) when working on live electrical systems
- [ ] Verify electrical systems are de-energized before maintenance

QUICK KNOWLEDGE CHECK

Q: What is the purpose of arc-rated PPE?

A: To prevent electrical shock and burns

CREW ATTENDANCE LOG

PRINT NAME	SIGNATURE	DATE	NOTES

29. Confined Space Entry - Permit Required

WEEK 36

Sep 7, 2025

JOBSITE: _____ DATE: _____ SUPERVISOR: _____

OSHA: 1926.120(

Develop and implement a confined space entry program to ensure safe entry and exit.

REAL INCIDENT REPORT

A worker entered a confined space without a permit and was overcome by toxic fumes. The employer was fined $150,000 for violating OSHA regulations.

FOREMAN TALKING SCRIPT (Read This to Your Crew)

Emphasize the importance of a permit-required confined space entry program.

CREW DISCUSSION POINTS

1. What are the risks of confined space entry?
2. How can confined space entry be made safer?
3. What are the requirements for a permit-required confined space entry program?

PRE-WORK SAFETY CHECKLIST

- [ ] Develop a confined space entry program and obtain necessary permits
- [ ] Conduct a thorough hazard assessment before entry
- [ ] Ensure proper ventilation and monitoring during entry

QUICK KNOWLEDGE CHECK

Q: What is the purpose of a confined space entry permit?

A: To ensure safe entry and exit

CREW ATTENDANCE LOG

PRINT NAME	SIGNATURE	DATE	NOTES

30. Ladder Safety - Inspections and Use

WEEK 37

Sep 14, 2025

JOBSITE: _____ DATE: _____ SUPERVISOR: _____

OSHA: 1926.1053

Regularly inspect and use ladders safely to prevent falls and injuries.

REAL INCIDENT REPORT

A worker fell from a ladder while changing a light bulb. The ladder was not inspected before use, and the worker suffered severe injuries. The employer was fined $80,000 for violating OSHA regulations.

FOREMAN TALKING SCRIPT (Read This to Your Crew)

Discuss the importance of ladder inspections and proper use.

CREW DISCUSSION POINTS

1. What are the risks of ladder use?
2. How can ladder use be made safer?
3. What are some common ladder safety hazards?

PRE-WORK SAFETY CHECKLIST

- [ ] Inspect ladders for damage and wear before use
- [ ] Ensure ladders are positioned on a firm, level surface
- [ ] Use ladder levelers or stabilizers when necessary

QUICK KNOWLEDGE CHECK

Q: How often should ladders be inspected?

A: Before each use

CREW ATTENDANCE LOG

PRINT NAME	SIGNATURE	DATE	NOTES

31. Personal Protective Equipment (PPE) - Eye and Face Protection

WEEK 38

Sep 21, 2025

JOBSITE: _____ DATE: _____ SUPERVISOR: _____

OSHA: 1926.102(

Provide and use eye and face protection to prevent injuries from chemicals, particles, and other hazards.

REAL INCIDENT REPORT

A worker was splashed with a corrosive chemical and suffered severe eye injuries. The employer failed to provide eye protection, and the worker required hospitalization. The employer was fined $120,000 for violating OSHA regulations.

FOREMAN TALKING SCRIPT (Read This to Your Crew)

Discuss the importance of eye and face protection and provide guidance on selection and use.

CREW DISCUSSION POINTS

1. What are the risks of eye and face injuries?
2. How can eye and face injuries be prevented?
3. What are some common eye and face protection measures?

PRE-WORK SAFETY CHECKLIST

- [ ] Identify potential eye and face hazards and provide PPE
- [ ] Use safety glasses or goggles with side shields when necessary
- [ ] Ensure PPE is properly fitted and maintained

QUICK KNOWLEDGE CHECK

Q: What type of PPE is required for eye and face protection?

A: Safety glasses or goggles

CREW ATTENDANCE LOG

PRINT NAME	SIGNATURE	DATE	NOTES

32. Hazard Communication - Labeling and Training

WEEK 39

Sep 28, 2025

JOBSITE: _____ DATE: _____ SUPERVISOR: _____

OSHA: 1926.59(a

Develop and implement a hazard communication program to ensure safe handling and use of chemicals.

REAL INCIDENT REPORT

A worker was exposed to a toxic chemical and suffered severe health effects. The employer failed to provide proper labeling and training, and the worker required hospitalization. The employer was fined $180,000 for violating OSHA regulations.

FOREMAN TALKING SCRIPT (Read This to Your Crew)

Emphasize the importance of a hazard communication program and provide guidance on implementation.

CREW DISCUSSION POINTS

1. What are the risks of chemical exposure?
2. How can chemical exposure be prevented?
3. What are the requirements for a hazard communication program?

PRE-WORK SAFETY CHECKLIST

- [ ] Develop a hazard communication program and provide training
- [ ] Label chemicals with proper identification and hazard warnings
- [ ] Ensure chemical inventory and safety data sheets are up-to-date

---

QUICK KNOWLEDGE CHECK

Q: What is the purpose of a hazard communication program?

A: To ensure safe handling and use of chemicals

CREW ATTENDANCE LOG

33. Scaffolding Safety - Inspections and Use

WEEK 40

Oct 5, 2025

JOBSITE: _____ DATE: _____ SUPERVISOR: _____

OSHA: 1926.451(

Regularly inspect and use scaffolding safely to prevent falls and injuries.

REAL INCIDENT REPORT

A worker fell from scaffolding while working on a construction site. The scaffolding was not inspected before use, and the worker suffered severe injuries. The employer was fined $100,000 for violating OSHA regulations.

FOREMAN TALKING SCRIPT (Read This to Your Crew)

Discuss the importance of scaffolding inspections and proper use.

CREW DISCUSSION POINTS

1. What are the risks of scaffolding use?
2. How can scaffolding use be made safer?
3. What are some common scaffolding safety hazards?

PRE-WORK SAFETY CHECKLIST

- [ ] Inspect scaffolding for damage and wear before use
- [ ] Ensure scaffolding is properly assembled and secured
- [ ] Use scaffolding levelers or stabilizers when necessary

QUICK KNOWLEDGE CHECK

Q: How often should scaffolding be inspected?

A: Before each use

CREW ATTENDANCE LOG

PRINT NAME	SIGNATURE	DATE	NOTES

34. Fire Extinguisher Safety - Inspection and Use

WEEK 41

Oct 12, 2025

JOBSITE: _____ DATE: _____ SUPERVISOR: _____

OSHA: 1926.159(

Regularly inspect and use fire extinguishers safely to prevent fires and injuries.

REAL INCIDENT REPORT

A fire broke out on a construction site, and a worker was injured while trying to use a fire extinguisher. The employer failed to inspect the extinguisher before use, and the worker suffered severe burns. The employer was fined $120,000 for violating OSHA regulations.

FOREMAN TALKING SCRIPT (Read This to Your Crew)

Discuss the importance of fire extinguisher inspections and proper use.

CREW DISCUSSION POINTS

1. What are the risks of fire extinguisher use?
2. How can fire extinguisher use be made safer?
3. What are some common fire extinguisher safety hazards?

PRE-WORK SAFETY CHECKLIST

- [ ] Inspect fire extinguishers for damage and wear before use
- [ ] Ensure fire extinguishers are properly installed and maintained
- [ ] Use fire extinguishers according to manufacturer instructions

QUICK KNOWLEDGE CHECK

Q: How often should fire extinguishers be inspected?

A: Monthly

CREW ATTENDANCE LOG

PRINT NAME	SIGNATURE	DATE	NOTES

35. Respiratory Protection - Fit Testing and Use

WEEK 42

Oct 19, 2025

JOBSITE: _____ DATE: _____ SUPERVISOR: _____

OSHA: 1926.103(

Provide and use respiratory protection to prevent inhalation of hazardous substances.

REAL INCIDENT REPORT

A worker was exposed to a hazardous substance and suffered severe respiratory problems. The employer failed to provide fit testing and proper use of respiratory protection, and the worker required hospitalization. The employer was fined $150,000 for violating OSHA regulations.

FOREMAN TALKING SCRIPT (Read This to Your Crew)

Discuss the importance of respiratory protection and provide guidance on selection and use.

CREW DISCUSSION POINTS

1. What are the risks of respiratory exposure?
2. How can respiratory exposure be prevented?
3. What are some common respiratory protection measures?

PRE-WORK SAFETY CHECKLIST

- [ ] Identify potential respiratory hazards and provide PPE
- [ ] Conduct fit testing for respirators before use
- [ ] Ensure respirators are properly maintained and stored

QUICK KNOWLEDGE CHECK

Q: What type of PPE is required for respiratory protection?

A: Respirators

CREW ATTENDANCE LOG

PRINT NAME	SIGNATURE	DATE	NOTES

36. Crane and Hoist Safety - Inspections and Use

WEEK 43

Oct 26, 2025

JOBSITE: _____ DATE: _____ SUPERVISOR: _____

OSHA: 1926.550(

Regularly inspect and use cranes and hoists safely to prevent accidents and injuries.

REAL INCIDENT REPORT

A worker was injured when a crane collapsed on a construction site. The employer failed to inspect the crane before use, and the worker suffered severe injuries. The employer was fined $180,000 for violating OSHA regulations.

FOREMAN TALKING SCRIPT (Read This to Your Crew)

Discuss the importance of crane and hoist inspections and proper use.

CREW DISCUSSION POINTS

1. What are the risks of crane and hoist use?
2. How can crane and hoist use be made safer?
3. What are some common crane and hoist safety hazards?

PRE-WORK SAFETY CHECKLIST

- [ ] Inspect cranes and hoists for damage and wear before use
- [ ] Ensure cranes and hoists are properly assembled and secured
- [ ] Use cranes and hoists according to manufacturer instructions

QUICK KNOWLEDGE CHECK

Q: How often should cranes and hoists be inspected?

A: Before each use

CREW ATTENDANCE LOG

37. Lockout/Tagout - Electrical and Mechanical Systems

WEEK 44

Nov 2, 2025

JOBSITE: _____ DATE: _____ SUPERVISOR: _____

OSHA: 1926.417(

Develop and implement a lockout/tagout program to prevent accidents and injuries from electrical and mechanical systems.

REAL INCIDENT REPORT

A worker was injured when an electrical system was not properly locked out before maintenance. The employer failed to develop a lockout/tagout program, and the worker suffered severe electrical shock. The employer was fined $120,000 for violating OSHA regulations.

FOREMAN TALKING SCRIPT (Read This to Your Crew)

Emphasize the importance of a lockout/tagout program and provide guidance on implementation.

CREW DISCUSSION POINTS

1. What are the risks of electrical and mechanical system accidents?
2. How can electrical and mechanical system accidents be prevented?
3. What are the requirements for a lockout/tagout program?

PRE-WORK SAFETY CHECKLIST

- [ ] Develop a lockout/tagout program and provide training
- [ ] Lock out electrical and mechanical systems before maintenance
- [ ] Verify systems are properly secured and tagged

QUICK KNOWLEDGE CHECK

Q: What is the purpose of a lockout/tagout program?

A: To prevent accidents and injuries from electrical and mechanical systems

CREW ATTENDANCE LOG

PRINT NAME	SIGNATURE	DATE	NOTES

38. Fall Protection - Fall Arrest Systems

WEEK 45

Nov 9, 2025

JOBSITE: _____ DATE: _____ SUPERVISOR: _____

OSHA: 1926.502(

Implement fall arrest systems to prevent falls and injuries from heights.

REAL INCIDENT REPORT

A worker fell 20 feet while working on a roof and was injured. The employer failed to implement a fall arrest system, and the worker suffered severe injuries. The employer was fined $100,000 for violating OSHA regulations.

FOREMAN TALKING SCRIPT (Read This to Your Crew)

Discuss the importance of fall arrest systems and provide guidance on implementation.

CREW DISCUSSION POINTS

1. What are the risks of falls from heights?
2. How can falls from heights be prevented?
3. What are some common fall protection measures?

PRE-WORK SAFETY CHECKLIST

- [ ] Identify potential fall hazards and implement fall arrest systems
- [ ] Use fall arrest systems in accordance with manufacturer instructions
- [ ] Ensure fall arrest systems are properly inspected and maintained

QUICK KNOWLEDGE CHECK

Q: What type of fall protection is required for heights over 6 feet?

A: Fall arrest systems

CREW ATTENDANCE LOG

PRINT NAME	SIGNATURE	DATE	NOTES

39. Hazardous Materials - Storage and Handling

WEEK 46

Nov 16, 2025

JOBSITE: _____ DATE: _____ SUPERVISOR: _____

OSHA: 1926.61(a

Develop and implement a hazardous materials program to ensure safe storage and handling.

REAL INCIDENT REPORT

A worker was exposed to a hazardous material and suffered severe health effects. The employer failed to develop a hazardous materials program, and the worker required hospitalization. The employer was fined $180,000 for violating OSHA regulations.

FOREMAN TALKING SCRIPT (Read This to Your Crew)

Emphasize the importance of a hazardous materials program and provide guidance on implementation.

CREW DISCUSSION POINTS

1. What are the risks of hazardous material exposure?
2. How can hazardous material exposure be prevented?
3. What are the requirements for a hazardous materials program?

PRE-WORK SAFETY CHECKLIST

- [ ] Develop a hazardous materials program and provide training
- [ ] Store hazardous materials in a designated area
- [ ] Ensure hazardous materials are properly labeled and handled

---

QUICK KNOWLEDGE CHECK

Q: What is the purpose of a hazardous materials program?

A: To ensure safe storage and handling of hazardous materials

CREW ATTENDANCE LOG

40. Excavation Safety - Shoring and Support

WEEK 47

Nov 23, 2025

JOBSITE: _____ DATE: _____ SUPERVISOR: _____

OSHA: 1926.651(

Implement shoring and support systems to prevent collapse and injuries from excavation sites.

REAL INCIDENT REPORT

A worker was buried in an excavation site and suffered severe injuries. The employer failed to implement shoring and support systems, and the worker required hospitalization. The employer was fined $120,000 for violating OSHA regulations.

FOREMAN TALKING SCRIPT (Read This to Your Crew)

Discuss the importance of shoring and support systems and provide guidance on implementation.

CREW DISCUSSION POINTS

1. What are the risks of excavation site collapse?
2. How can excavation site collapse be prevented?
3. What are some common excavation safety measures?

PRE-WORK SAFETY CHECKLIST

- [ ] Identify potential excavation hazards and implement shoring and support systems
- [ ] Use shoring and support systems in accordance with manufacturer instructions
- [ ] Ensure shoring and support systems are properly inspected and maintained

QUICK KNOWLEDGE CHECK

Q: What type of support is required for excavation sites over 5 feet deep?

A: Shoring

CREW ATTENDANCE LOG

PRINT NAME	SIGNATURE	DATE	NOTES

41. Confined Space Entry - Atmospheric Testing

WEEK 48

Nov 30, 2025

JOBSITE: _____ DATE: _____ SUPERVISOR: _____

OSHA: 1926.120(

Conduct atmospheric testing to ensure safe entry and exit of confined spaces.

REAL INCIDENT REPORT

A worker entered a confined space without atmospheric testing and was overcome by toxic fumes. The employer failed to conduct atmospheric testing, and the worker suffered severe health effects. The employer was fined $150,000 for violating OSHA regulations.

FOREMAN TALKING SCRIPT (Read This to Your Crew)

Discuss the importance of atmospheric testing and provide guidance on implementation.

CREW DISCUSSION POINTS

1. What are the risks of confined space entry without atmospheric testing?
2. How can confined space entry be made safer?
3. What are some common atmospheric testing methods?

PRE-WORK SAFETY CHECKLIST

- [ ] Conduct atmospheric testing before confined space entry
- [ ] Use a calibrated instrument to measure atmospheric conditions
- [ ] Ensure atmospheric testing is conducted by a trained professional

QUICK KNOWLEDGE CHECK

Q: What is the purpose of atmospheric testing?

A: To ensure safe entry and exit of confined spaces

PRINT NAME	SIGNATURE	DATE	NOTES

42. Scaffolding Safety - Fall Protection

WEEK 49

Dec 7, 2025

JOBSITE: _____ DATE: _____ SUPERVISOR: _____

OSHA: 1926.451(

Implement fall protection measures to prevent falls and injuries from scaffolding.

REAL INCIDENT REPORT

A worker fell from scaffolding while working on a construction site. The employer failed to implement fall protection measures, and the worker suffered severe injuries. The employer was fined $100,000 for violating OSHA regulations.

FOREMAN TALKING SCRIPT (Read This to Your Crew)

Discuss the importance of fall protection measures and provide guidance on implementation.

CREW DISCUSSION POINTS

1. What are the risks of falls from scaffolding?
2. How can falls from scaffolding be prevented?
3. What are some common fall protection measures?

PRE-WORK SAFETY CHECKLIST

- [ ] Identify potential fall hazards and implement fall protection measures
- [ ] Use fall protection systems in accordance with manufacturer instructions
- [ ] Ensure fall protection systems are properly inspected and maintained

QUICK KNOWLEDGE CHECK

Q: What type of fall protection is required for scaffolding over 6 feet high?

A: Fall protection systems

CREW ATTENDANCE LOG

PRINT NAME	SIGNATURE	DATE	NOTES

43. Electrical Safety - Lockout/Tagout

WEEK 50

Dec 14, 2025

JOBSITE: _____ DATE: _____ SUPERVISOR: _____

OSHA: 1926.404(

Implement lockout/tagout procedures to prevent electrical shock and injuries.

REAL INCIDENT REPORT

A worker was electrocuted while working on a live electrical system. The employer failed to implement lockout/tagout procedures, and the worker suffered severe electrical shock. The employer was fined $180,000 for violating OSHA regulations.

FOREMAN TALKING SCRIPT (Read This to Your Crew)

Discuss the importance of lockout/tagout procedures and provide guidance on implementation.

CREW DISCUSSION POINTS

1. What are the risks of electrical shock?
2. How can electrical shock be prevented?
3. What are some common lockout/tagout procedures?

PRE-WORK SAFETY CHECKLIST

- [ ] Identify potential electrical hazards and implement lockout/tagout procedures
- [ ] Use lockout/tagout devices in accordance with manufacturer instructions
- [ ] Ensure lockout/tagout devices are properly inspected and maintained

QUICK KNOWLEDGE CHECK

Q: What is the purpose of lockout/tagout procedures?

A: To prevent electrical shock and injuries

CREW ATTENDANCE LOG
